Step 1.   Inside the box you will find two separate boxes. The larger of the two contains the grinder and the PortaHolder (if applicable). The other contains the hopper, lid, grounds bin, burr removal tool, and calibration tool.

Step 2.   Remove the grinder from the box by lifting the plastic bag and pulling straight up.

IMPORTANT! For grinders with scales, the weight platform (scale) is fragile, and can be damaged by excess weight or force. Be gentle. Do NOT press down on it.

Step 3.   With the hopper lid in place, mount the hopper on the grinder by lining up the two small tabs at the base of the hopper with the two slots inside the collar. Turn the hopper clockwise until it locks into position (expect to apply force).

Step 4.   Plug in the grinder. Add beans, insert the grounds bin. Adjust the Macro and Micro setting for the preferred brewing method. **Macro grind adjustments should be made while the unit is running.** See Table below for suggested settings.

	Espresso	Dripper			Full Immersion		
		Brewers	V60	Chemex	AeroPress	Siphon	French Press
Steel	2K	4M	3Z	70	3N	4N	8M
Ceramic	#1-3	6M	6M	10L	5N	6M	10Z

Note that these are just starting points; you will need to dial in the grind to your preference. For additional information on grind settings and brewing methods go to the support tab at www.baratza.com. (* May require recalibration).

Step 5.   To operate the grinder, do the following:
   ◊   For the Vario, choose a preset number and press Start.
   ◊   For the Vario-W, press the Tare button, choose a preset number and press Start.
   ◊   For the Forté press **Weight**, then press **Tare**, choose a preset number, and press Start or, when grinding by time, choose a preset number and press Start.

Step 6.   To set a programmable Time/Weight button (1,2,3), use up/down arrows to adjust to preferred time/weight, then press and hold desired button until the display flashes. You have now stored the new time/weight.

If you think that your grinder is not performing correctly, please go to our online troubleshooting located at www.baratza.com/troubleshooting or to our YouTube video troubleshooting at https://www.youtube.com/user/Baratzallc1
